Dear Paul,

Context: I am reading the narrative on the **Colorado River Region**. I am wondering to what degree we should include the particulars of the Colorado Water River Delivery Agreement: Federal Quantification Settlement Agreement, dated October 10, 2003, in this version of the State Water Plan. I see in **Volume 1, Chapter 2, California Water Today**, pdf file page 7, that the document is called the *California Water Plan Update 2004*, so I guess that means that agreements that were approved in 2003 should be included in the plan, which is now the 2004 Update. At the least, I found & recommend the following:

Required edits:

- In the **South Coast Region** narrative, both the QSA and Drought are commented on - [http://www.waterplan.water.ca.gov/b160/B160.Draft.June.7.2004/Vol\\_3/vol3SC.pdf](http://www.waterplan.water.ca.gov/b160/B160.Draft.June.7.2004/Vol_3/vol3SC.pdf) - pdf file page 5, and page 8, pages 11-12. On these topics, the **Colorado River Region** narrative needs to be brought into conformity with the **South Coast Region** narrative.
- The **South Coast Region** narrative, pdf file page 16, contains the box titled, "Key Elements of Colorado River Quantification Settlement Agreements." As I indicated in my January review of the Colorado River Region, the source of this information, which is directly quoted from an AP article I provided to DWR, needs to be cited. The citation information is contained in the box on page 16 (hard copy) of the Colorado River Region narrative.
- **Volume 1, Chapter 2, California Water Today**, pdf file page 13 for *South Coast Region*, Water Supply Reliability refers to the requirement to reduce use of Colorado River water to 4.4 maf during years of normal hydrologic flow (when no surplus is declared). This language needs to be included in the Water Supply Reliability write-up for the Colorado River Region - pdf file page 16 - of Volume 1, Chapter 2, California Water today.

Dear Mike,

When compiling the ag caucus comments for the AC Review Draft, please include the above bullets.
